

Cancer know the warning signs

...and get them checked out by your doctor

Cancer is easier to treat and cure if diagnosed early

Symptoms anywhere on your body:

An unusual lump or swelling (including neck, armpit, abdomen, groin, testicle or breast area).

A change in the size, shape and colour of a mole.

A sore that won't heal after several weeks.

Unexplained weight loss or heavy night sweats.

Unexplained pain or ache that lasts longer than 4 weeks.

A mouth or tongue ulcer that lasts longer than 3 weeks

A cough or croaky voice that lasts longer than 3 weeks

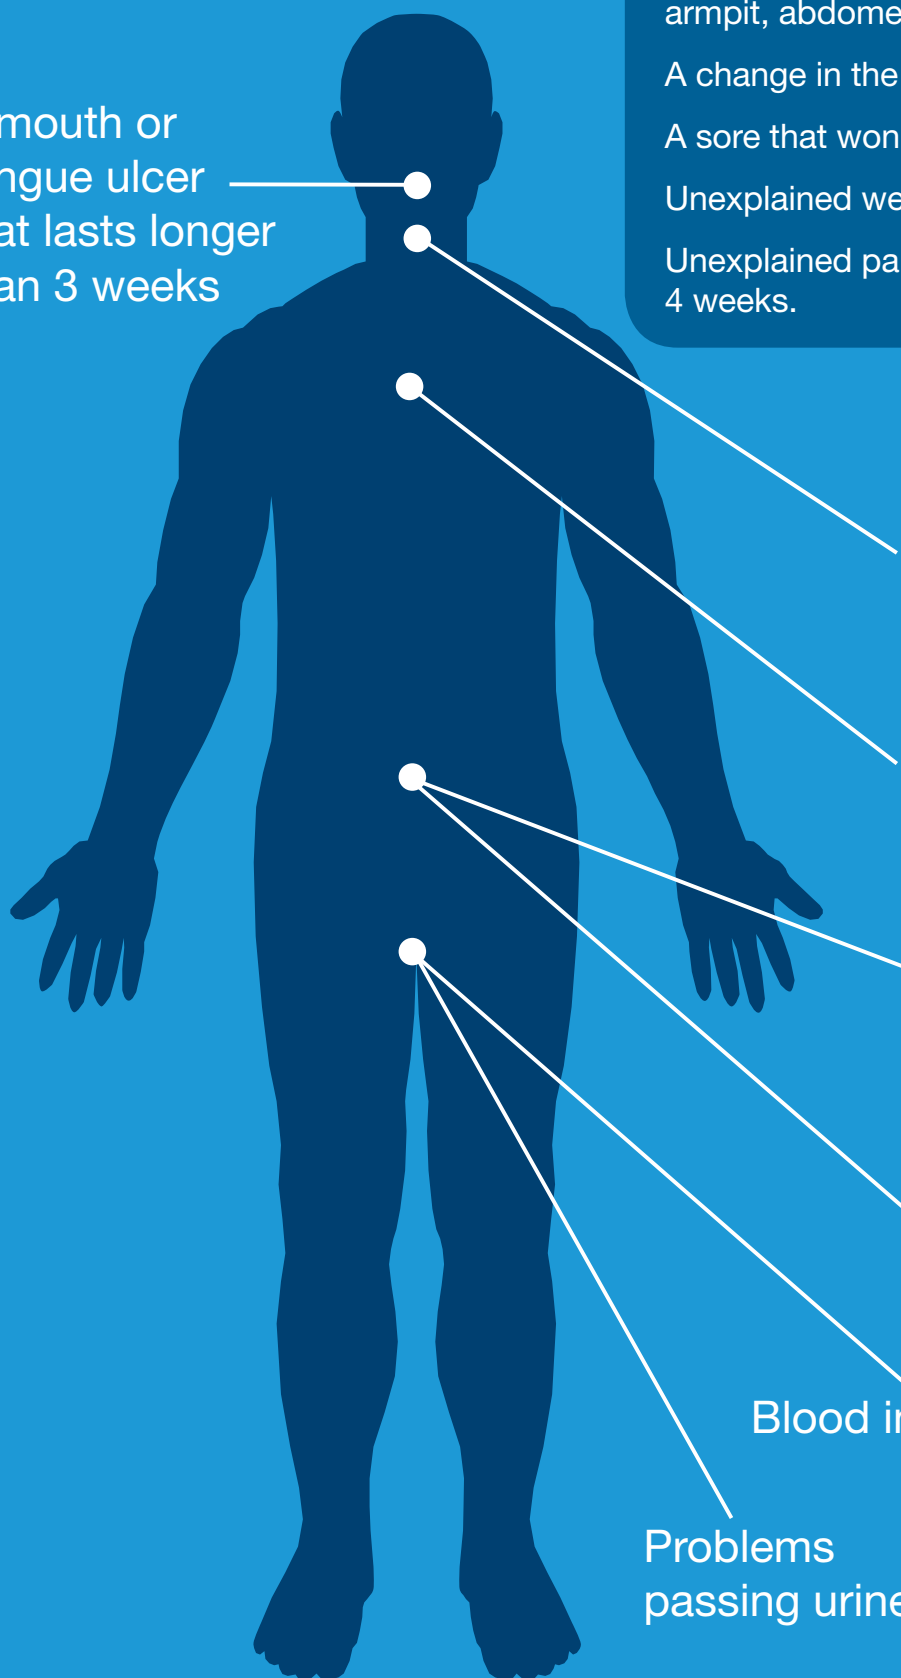

Persistent difficulty swallowing or indigestion

Blood in your bowel motions

A change to more frequent and looser bowel motions that last longer than 4-6 weeks

Blood in your urine

Problems passing urine
